Rush Press—FTP Instructions

ftp.rushpress.com
username: rushpress
password: 3553

- Username and password are both to be typed lowercase.
- There are no spaces between words.
- PC users should place all files to be sent into a ZIP archive file.
- MAC users should place all files to be sent into a STUFFIT archive file.
- Mac users using OS-10 should use Cyberduck to download to the ftp server— Fetch is fine for Mac OS-9 users.
- Transfers should be made in *passive* mode—using active mode will result in a failed transmission.

Important: To confirm file transmission, once the files have been uploaded please send a low-res pdf to your Rush Press sales contact with the filename of the job sent and the software used.
